## Tugas Praktikum 2

The screenshot shows the Android Studio interface with the following details:

- Project Structure:** The project is named "flutter\_test\_25". It contains an "Android" folder with a "flutter\_test\_25" directory, which includes "java", "main.dart", "tests", and "widget\_test.dart".
- Main Dart File:** The "main.dart" file is open in the editor, showing the following code:

```
import 'package:flutter/material.dart';

void main() {
  runApp(const MyApp());
}

class MyApp extends StatelessWidget {
  const MyApp({super.key});

  // This widget is the root of your application.
  @override
  Widget build(BuildContext context) {
    return MaterialApp(
      title: 'Flutter Demo',
      theme: ThemeData(
        // This is the theme of your application.
        //
        // TRY THIS: Try running your application with "flutter run -d
        // the application has a purple toolbar. Then, without
        // trying changing the seedColor in the colorScheme below
        // and then invoke "hot reload" (save your changes or
        // "reload" button in a Flutter-supported IDE, or press
        // the command line to start the app).
        //
        // Notice that the counter didn't reset back to zero
    );
}
```
- Emulator:** A Pixel 7 API 36.0 emulator is running, displaying the "Flutter Demo Home Page". The page shows a counter with the value "4" and the text "You have pushed the button this many times: 4".
- Logcat:** The bottom section shows the Android logcat output:

```
I/flutter_test_25( 4556): Background concurrent mark compact GC freed 1677KB AllocSpace bytes, 4(76KB) LOS objects, 49% free, 2291KB/4582KB, paused 378us,10.008ms
total 399.853ms
D/ActivityThread( 4556): Package [com.android.vending] reported as REPLACED, but missing application info. Assuming REMOVED.
